Virtual Dementia Tour[®]

Quality care for people dealing with Alzheimer's disease and related dementias begins with family members and caregivers who are sensitive, patient, and kind. But how can people be empathetic when they have never experienced firsthand the physical and mental challenges facing those with dementia? Now there is a way.

The Virtual Dementia Tour—a scientifically proven method of building a greater understanding of dementia through the use of patented sensory tools and instruction—is Your Window into Their World.
